

# Explore. Discover. Predict.

## Calling all biodiversity researchers (with a passion for photography)

The Biodiversity and Climate Change Virtual Laboratory (BCCVL) is a “one stop modelling shop” that simplifies the process of biodiversity-climate change modelling. It’s a web-based application that couples extensive processing power with direct access to a comprehensive, coherent suite of biological, environmental and climate change data collections, and model algorithms.

To celebrate the upcoming release of the BCCVL, we are offering a prime spot on our homepage to biodiversity researchers to exhibit the focus of their work.

We are looking for images that capture the essence of biodiversity that we can use to showcase the BCCVL website and application. We will also provide a news article on our site promoting your research project or interest.

This is the perfect opportunity to display your research to a greater audience.

**Enter at [www.bccvl.org.au](http://www.bccvl.org.au) or register your interest for early access to the BCCVL.**

You can submit your photos until August 15, 2014.

#### Terms and conditions

1. All artwork entered must be original artistic work of the Entrant and does not infringe the rights of any third parties. If the entry or any part of the information provided to the Entrant in relation to the entry was provided by a third party, the Entrant warrants that they have obtained the relevant copyright permission. The Entrant agrees to indemnify the BCCVL against all claims and costs by third parties arising from a breach of the warranty set out in this condition. 3. All images submitted may be used at the discretion of the BCCVL in future. 4. No correspondence will be entered into.
